

Great Wall Reusable Food Grade Filter Bag

The filter bag is made of food-grade materials, and it is recyclable and durable. It has five stitched seams, completely locking the edges, and a strong drawstring. The large opening makes it easy to pour in and pour out more products. It is easy to clean and dry after use. It is also BPA-free. There are four materials for you to choose from.

Food grade filter bag usage

Coarse filtration is suitable for vegetables, fats, juicing aquariums, soy products, wine, honey, etc.

Middle-grade filtration is suitable for malt, wine, fruit juice, bean paste, starch, beverages, coffee, milk, milk tea, etc.

Fine filtration is suitable for extremely fine particles such as liquor, edible oil, mineral water, etc.
